Agenda ver13

# SECURITY & DATA PROTECTION

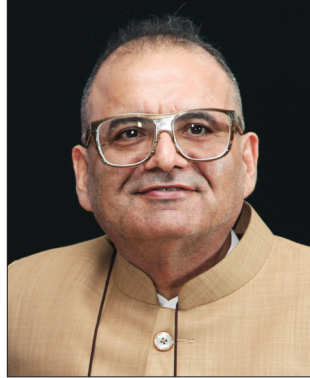

India is transforming into a digital society owing to increased internet penetration which increased sharply from 2015 onwards. With over 750 million active internet users as of 2020, India is one of the largest digital markets in the world attracting global players. The rise in digital services being provided online by both the public and the private sectors has led to the generation of huge amounts of data. However, due to the unprecedented growth witnessed in internet accessibility entirely novel business models have sprung up which collect and analyse personal data for commercial purposes. The use of personal data for commercial purposes without any clear regulatory and legal frameworks poses grave risks for individual autonomy and privacy.

There is a need to construct an institutional and legal framework in such a way that it ensures utmost privacy for individuals while encouraging businesses to innovate and expand. There exists a need for a more comprehensive law to address data privacy concerns. The Personal Data Protection Bill seeks to include many aspects of the European Union GDPR laws. There are several challenges in implementing an effective data protection law such as how to govern the use of big data by large technology corporations and how to strike a balance between National security and citizen privacy concerns

Therefore policy formulation has to take into account all the recent developments in the area of commercial use of personal data so that legislation does not prove to be inadequate to handle the complex challenges that exist in this field. The policy has to strike a fine balance between necessary compliance and over-regulation. Because the bill will regulate the use of data in almost all economic activities there can be significant compliance costs specifically for businesses that are small in size. There has to be consultative dialogue with all the concerned stakeholders so that upcoming legislation can fulfil the tasks of protecting personal data and encouraging innovation

# PUBLIC POLICY FORUM & LITFest

0920-1030 | SETTING THE STAGE

**Sameer Kochhar**  
Author and Chairman  
SKOCH Group

**Gulshan Rai**
